

# Energy & Carbon Data Management

Reduce costs, enhance brand, facilitate strategic planning

## ECM HUB<sup>SM</sup> Integrated Data Management System

**Visibility into Operations**  
Key performance metrics facilitate strategic planning and timely decisions

**Dynamic Analytics**  
Near real-time data intelligence with automated collection and management

**Transparent Records**  
Secure, web-based environment for easy communication with stakeholders

**Resource Efficiency**  
Reduces burden on resources, allowing management to focus on core business

**Brand Enhancement**  
Implement, manage, and disclose sustainability efforts

## Make Your Data Work for You

Pace is the pioneer and a consistent leader in providing comprehensive and integrated energy & carbon management, with over 30 years of industry experience.

Pace Energy & Carbon Management [ Pace ECM<sup>SM</sup> ] delivers a fast, effective, and economical solution to energy management and sustainability needs. Our advanced web-based energy & carbon data management systems - Energy Zone<sup>®</sup> and ecolink<sup>®</sup> - are integrated to provide an enterprise-wide communication platform that centralizes energy procurement, and sustainability metrics.

We call this your ECM Hub<sup>SM</sup>. It provides the core energy & carbon management framework from which stakeholders are empowered to make informed planning decisions that positively affect the company's bottom line.

In less than two months, you can institute a culture of energy & carbon awareness that reduces costs, enhances brand, and facilitates strategic planning.

For more information or to request a demonstration, please call 1-800-476-4872 (option 1) or email [EnergyManagement@PaceGlobal.com](mailto:EnergyManagement@PaceGlobal.com).
